Bangalore, India · +91 7980710724 · rishikvarma1909@gmail.com · linkedin.com/in/rishik-varma · github.com/rishik-varma

SUMMARY

Software Engineer with 4+ years of experience building scalable Java/Python services, distributed backend applications, and production AI systems. Shipped reliable multi-tier workflows serving 100K beta customers, with hands-on ownership of APIs, asynchronous processing, concurrency, testing, observability, and production reliability. Strong foundation in data structures, algorithms, object-oriented design, and software design.

SKILLS

Languages & Backend: Java, Python, C++, TypeScript, SQL, Groovy; Spring Boot, FastAPI, Node.js, React.js, Apollo GraphQL

Distributed Systems: Synchronous/asynchronous design, multithreading, concurrency, REST/GraphQL APIs, Kafka, Redis, caching, retries, RAG

Data & Infrastructure: PostgreSQL, MySQL, MS SQL Server, MongoDB; AWS, Docker, Jenkins, CI/CD, Splunk, Gatling, PagerDuty

AI/ML: LangGraph, LangChain, MCP, Langfuse, LLM evals, agent orchestration, OpenAI, Claude, prompt engineering

EXPERIENCE

Intuit

May 2024 – Present

Software Engineer 2 – Workforce AI / Payroll Intelligence Agent

Bangalore, India

- Co-owned a multi-tier LangGraph backend application live to **100K beta customers**; shipped 5 run-payroll skills at **88.8% L1 quality vs. 70% baseline** with production APIs, business logic, and 24x7 operational support.
- Re-architected GPP archival in a **Java/Spring** service using concurrent processing and eager loading, reducing execution time from **7.8 days to under 1 hour (95%)** while preserving correctness at scale.
- Hardened an asynchronous orchestration service with RAG fallback, per-node timeouts, retries, and failure isolation; eliminated the top 3 on-call incident categories and resolved **154 simultaneous production failures** with zero recurrence.
- Designed and shipped **8 production MCP APIs/tools** and a 25-scenario golden evaluation dataset powering QuickBooks Payroll's first integrations with Claude and OpenAI; authored design documents for accuracy measurement and MCP caching.
- Built a 712-line status service with 2,332 lines of unit tests: concurrent multi-source fetch across time entries, daily storage, and draft payroll, followed by an LLM-orchestrated customer summary with feature-flagged prompt versions.
- Pioneered an LLM payroll anomaly detector gating every QBO Payroll run; designed TP/FP evaluation and observability loops, raising golden-set completeness to **97.8%** and projecting a **96% reduction** in paycheck corrections.
- Delivered **88+ commits with over 85% test coverage** across Java/Spring, Python, React/TypeScript, and Groovy; led a year-end UI release with **zero P0/P1/P2 defects** across 13 companies and unblocked about 100 customer migrations.
- Built Splunk P50/P95/P99 and accuracy dashboards plus an 800+ line runbook; improved engineering productivity through design reviews, code reviews, AI Workbench sessions, and automation that reduced regression setup from 35 to 5 minutes.

Anchanto Services Pvt. Ltd.

Jul 2022 – May 2024

Software Development Engineer (Intern, Jan–Apr 2022)

Pune, India

- Increased throughput **30%** on a high-volume e-commerce order/inventory platform using Java multithreading, caching, and database-index tuning across MySQL/PostgreSQL services.
- Designed marketplace service integrations and resilient API workflows for Amazon, Lazada, and Shopee, with retries and error handling for SKU and order-status flows; unblocked 10+ enterprise sellers and contributed to **40% sales growth**.
- Resolved 20+ production incidents affecting 50+ clients and refactored legacy services using OOP and design patterns, improving on-call MTTR by **30%**.

EDUCATION

Bachelor of Engineering, Information Technology, Jadavpur University, Kolkata

2018 – 2022

CGPA: 8.9/10

ACHIEVEMENTS

ACM-ICPC 2020 Regionalist (Rank #264, Amritapuri) · 5-star (1800+) CodeChef · Advanced DSA certified · Recognized in Sr. Director/VP launch posts for Intuit Intelligence and Claude/OpenAI launches
